PROFESSIONAL SUMMARY

IT End-User Computing Support professional with hands-on experience in incident management, system deployment, user support, and technical troubleshooting. Proven ability to manage service requests, support enterprise applications, and ensure high levels of customer satisfaction. Experienced in Windows, Linux environments, LMS platforms, and collaboration tools. Strong background in User Acceptance Testing (UAT), system implementation, and stakeholder coordination.

CORE SKILLS

- End-User Computing Support (L1 Support)
- Incident & Service Request Management (SLA-focused)
- Hardware & Software Troubleshooting
- Windows 10/11 & Basic Mac OS Support
- Microsoft 365 | Google Workspace | Outlook | Zoom
- Email Configuration & Troubleshooting
- System Deployment & Configuration
- User Account Provisioning (Joiners/Leavers)
- User Acceptance Testing (UAT) & Manual QA
- Technical Documentation & Knowledge Base Updates
- IT Asset Management & Inventory Tracking
- Customer Service & Stakeholder Management

WORK EXPERIENCE

Educational Technology Assistant

May 15, 2024 - Present

University of San Agustin - Iloilo City, Philippines

- Provided Level 1 IT support to end users, resolving incidents related to LMS platforms, Microsoft tools, Zoom, and academic systems within SLA.
- Troubleshoot issues involving user accounts, login access, email concerns, and system navigation across multiple platforms.
- Supported Windows-based environments and assisted users with standard applications, including Microsoft Office and Google Workspace.
- Assisted in device and system setup for users, including onboarding support for new users (account access, system orientation, and tools setup).
- Performed software installation, configuration, and maintenance to ensure system availability and performance.
- Diagnosed technical issues independently and escalated complex cases to developers or vendors when necessary.
- Conducted User Acceptance Testing (UAT) and manual QA testing to ensure system readiness prior to deployment.
- Created and maintained technical documentation, user guides, and knowledge base articles for recurring issues.
- Maintained records of issues, resolutions, and system updates aligned with service management practices.
- Ensured high levels of customer satisfaction through responsive support and clear communication with users.

PROJECT EXPERIENCE

Outcome-Based Education (OBE) System Deployment

- Led coordination of system deployment lifecycle, including requirement gathering, testing, documentation, and user training.
- Worked closely with stakeholders to identify system requirements and translate them into functional solutions.

Web-Based Faculty Deliverables Monitoring System (WFDMS)

- Conducted UAT testing, documented issues, and collaborated with developers to ensure system readiness and performance.

TECHNICAL SKILLS

- Operating Systems: Windows, Linux (Ubuntu, AlmaLinux)
- Tools & Platforms: MS365, Google Workspace, Zoom, LMS (Moodle, NEO), MasterSoft
- Programming: Python, C, HTML, CSS, JavaScript, PHP
- Tools: Git, Visual Studio, PyCharm, Arduino IDE
- Networking: Basic networking (IP addressing, routers, switches)

EDUCATION

Bachelor of Science in Computer Engineering

July 2019 - July 2023

University of San Agustin

- Embedded Systems Specialization
- Thesis on “Development of Real-time Outdoor Air Quality Monitoring with Notification System for Transport Terminals”.
- President - Augustinian Computer Engineering Society (ACES) AY: 2022-2023

CERTIFICATIONS

- Google IT Support Certificate
- Networking Basics – Cisco
- Linux for Developers – Coursera
- Software Testing and Automation – Coursera

ADDITIONAL INFORMATION

- Strong troubleshooting and multitasking abilities in fast-paced environments
- Excellent communication skills for supporting users and collaborating with teams
- Willing to relocate to Metro Manila and work on a shifting schedule
- Eager to learn emerging technologies and improve IT service delivery
